

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Raiffeisen fond akciových trhů, otevřený podílový fond, Raiffeisen investiční společnost a.s.
[Raiffeisen Equity Markets Fund, open-ended mutual fund, Raiffeisen investiční společnost a.s.]
(hereinafter the “Fund”)

Class A1- Capitalisation	Class A2- Dividend	Class A3– RSTS
ISIN: CZ0008474442	ISIN: CZ0008474459	ISIN: CZ0008474467

The fund is a standard securities fund.

The Investment Company that manages the Fund (the Management Company):

Raiffeisen investiční společnost a.s., Registered Number (IČ): 29146739 (hereinafter also the “Company”).

OBJECTIVES AND INVESTMENT POLICY

The characteristics of the Fund are that of an equity fund. The Fund’s object is to achieve long-term growth of the assets of the Fund measured in Czech crowns, primarily by way of investments (at least 80% of the value of the assets of the Fund) in equity, and/or instruments bearing risk related to equity issued in Czech crowns, and/or traded, and/or focusing on Central and Eastern Europe and other emerging markets (at least 51 percent of the value of its assets).

To a smaller extent, it may also invest any entrusted assets into deposits with banks and invest in bonds or similar Securities. The Fund may also invest substantially in derivatives as part of its investment strategy; they may mainly serve for currency hedging. Other funds’ units may form up to 10 percent of the Fund assets. More detailed information is available in Chapter 8 of the Fund Prospectus.

The performance of the Fund is measured in CZK. The Fund is managed actively and does not copy or follow any specific index or indicator.

The Company cannot guarantee the achievement of the investment aim and no third party guarantees for protection of the investors are provided.

Fund units are issued and redeemed usually on each business day for the current value set in accordance with the Fund Prospectus. Further information about unit issues and redemption is specified in Chapter 13 of the Fund Prospectus.

The Fund issues various types of units designated in short as A1, A2 and A3 units. Class A1 and A3 units are capitalisation units and Class A2 units are dividend units. More specific information on the various classes of the units will be specified in the CHARGES section of this statement and in Chapter 14 of the Fund Prospectus.

Recommendation: The fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than ten years.

RISK AND REWARD PROFILE

← Usually lower reward			Usually higher reward →			
← Lower risk			Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 6.

The Synthetic Indicator 1 to 7 takes into account the fluctuation of the value of the units and shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that in comparison to higher numbers the investment offers a lower but more foreseeable reward.

In view of the date of the establishment of the Fund, the actual historical values of the Units cannot be used, so the calculation is based on modelled trends derived from the expected placement of assets. The indicator value was determined based on historical information, which is not

always a reliable guide when it comes to the future risk profile of the Fund. The risk and reward indicator is regularly re-assessed and its value can fluctuate up and down.

A typical investor should be aware of the risks associated with investments in equity (including without limitation market risks, currency risks, risks of insufficient liquidity, and emerging markets risks) and should be prepared to accept the risk of possible loss resulting from investments. The Fund, depending on the composition of its assets and management techniques, may show high volatility, when the value of the Fund Units may be exposed to high up-and-down fluctuations, even not excluding losses of capital. The value of investments can rise and fall. No return on such investments is guaranteed. More detailed information is available in Chapter 9 of the Fund Prospectus.
